

Pedagogical Framework

Corinda State High School

Overview

Corinda State High School's Pedagogical Framework guides all teaching staff to deliver evidence driven teaching and learning practices that are consistent, effective and inclusive. The Framework ultimately provides the tools to improve student outcomes and develops learners for the future. This Framework consists of three interrelated sections: the Instructional Model, Learning Environments and Expert Staff, which all contribute to shaping the life-long Corinda learner who possess integrity, compassion and who is curious and driven.

Instructional Model

Lessons at Corinda are designed using a range of high impact pedagogical practices, including explicit instruction, within the Gradual Release of Responsibility framework. Corinda staff are driven to maximise the potential of all students.

Expert Staff

Corinda's teaching staff are dynamic and take pride in being industry and curriculum experts, who work collegially to continue to grow and develop their practice.

Learning Environments

Corinda staff facilitate the creation of orderly learning environments that are also responsive to different learning contexts. Through the framework of Positive Education, staff and students build supportive relationships to enhance learning.
